

COP-22 Side event:

Elements and enablers of low-emissions pathways

Monday

14 November 2016

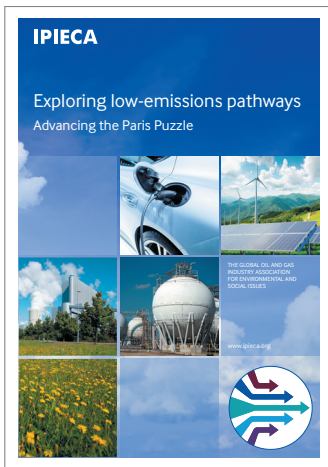

17:00 - 18:30

Side Event Room

IETA-WBCSD Pavilion

Marrakech, Morocco

This event will bring together experts to consider the key elements and enablers of a low-emissions pathways. IPIECA will share its views, with the highlights from its new paper, of the three common elements of any transition, along with the critical enablers. Expert panellists will discuss with the audience their views on these elements and enablers, and the role of oil and gas.
